Notes for Table 4:

The implied precision of data is a result of the calculation process, and should not be viewed as an "absolute".

¹Tonnages of municipal combustors are set in the conditions of the air and WMD permits.

²The Penacook tonnages reflect recent modifications to the WMD permit (575 tpd). Ash will be managed in the Franklin Landfill until 2009. Thereafter, the ash must be deducted from Penacook's ca

³The Claremont incinerator currently provides disposal for about 44,000 tpy to New Hampshire customers. The net amount is adjusted for ash that does not have a dedicated disposal locat

⁴Includes the facilities for Lebanon (48,000 tpy), Nashua (80,000 tpy)and Conway (10,000 tpy

⁵The estimated Turnkey amounts reflect achievements in density compaction. Possible future development potential of the site is not include

⁶NCES tonnages include requested expansion potential for the site (known as Stage IV

⁷Mt. Carberry tonnages do not include requested expansion potential for the site and do not include mill waste

⁸Available capacity is the total amount of capacity provided by all facilities in the inventory

⁹Anticipated shortfall assumes 30% diversion and the inclusion of all waste streams
